

Health & Safety

Fire Officers

We have nominated Fire Officers at each of our sites who are responsible for undertaking and reviewing fire risk assessments and for arranging and conducting regular unannounced fire drills. In addition, they are responsible for ensuring that the correct amount of firefighting and detection equipment is readily available and regularly checked and that sufficient and safe emergency routes and exits are provided and that these are clearly signed and kept free from obstruction.

A copy of each site's Fire Drill is published at each site.
